Congrats to all at TRAA for this progress! Having played a modest role in pushing a congenial staff at SCAQMD [using info from the stunning Nevada LGFSTF field testing on HF] to do hazard assessments of HF facility and transportation risks and to promulgate the original Rule 1410, only to see it rolled back in later conservative SCAQMD board actions, and in 2008 in helping the community organizations stave off a new MHF process proposed for the Bakersfield Big West refinery, I am delighted and optimistic that your research and organizing can solidify a new Rule 1410 that will also be useful for the other US communities with the 50 or so HF or MHF refineries, in TX, MN, etc..  
Bravo!

## **BREAKING NEWS!!! BELIEVE IT!!!**

### **The South Coast AQMD plans to adopt a new RULE 1410 BANNING HF/MHF at refineries by the end of 2017!!**

**This is fantastic and AMAZING progress. But, we need to keep fighting!!** Expect opposition. The SCAQMD credited the Torrance Refinery Action Alliance (TRAA) with providing hard evidence MHF is a fraud, no safer than HF, which must (finally!) be eliminated.

But now, all of us living or working in **the South Bay must redouble efforts** to make this ban happen! A rule would eliminate MHF/HF at both Torrance and the Valero in Wilmington refineries.

**The petrochemical industry will work to crush Rule 1410, or failing that, rewrite it to its own benefit.**

**Let your voice be heard! Join TRAA's  
Rally and March  
Saturday, Feb 18, 2017, 10:00 -11:30 a.m.**

**Columbia Park at the NW corner of W. 190th St. and Prairie Ave.**

**Demand a ban on MHF/HF on the 2nd anniversary of the 2015 explosion:  
a “near-miss” on 50,000 lb. of MHF.**

**Bring your neighbors, friends, and co-workers!**

**We can’t rest easy until MHF/HF is GONE. Volunteer to help or ask for information: [info@safetorrancerefinery.org](mailto:info@safetorrancerefinery.org).**

Tell SCAQMD Governing Board member Judy Mitchell and Wayne Nastri, Acting Executive Officer, thank you for acting in the interest of public health and safety! Let the AQMD know you support its plans to adopt Rule 1410 and will accept nothing less than a MHF/HF ban by 2020.
